Abstract of JP 8152748 (A)

PURPOSE: To copy only an optional page in color or with a high density without stopping copying operation by designating the optional page of an original image, and changing and setting an optional mode condition out of set common modes.

CONSTITUTION: This device is provided with a means 2 for designating a page on which the mode condition is changed and a means 3 for changing the mode condition on the page designated by the means 2 in addition to a mode setting means 1 for setting the common mode condition on copying magnification or density, etc. Then, the page on which the mode should be changed is designated by the means 2 in advance and the mode condition to be changed is set by the means 3 corresponding to the designated page.; When it comes to the page designated by the means 2 in the midst of copying operation in accordance with the mode condition set by the means 1, a part of the mode condition is automatically changed to the mode condition designated by the means 3 and copying is performed. When the copying of the designated page is finished, the copying is performed on the mode condition set by the means 1 again.
